## METAL INDUSTRY

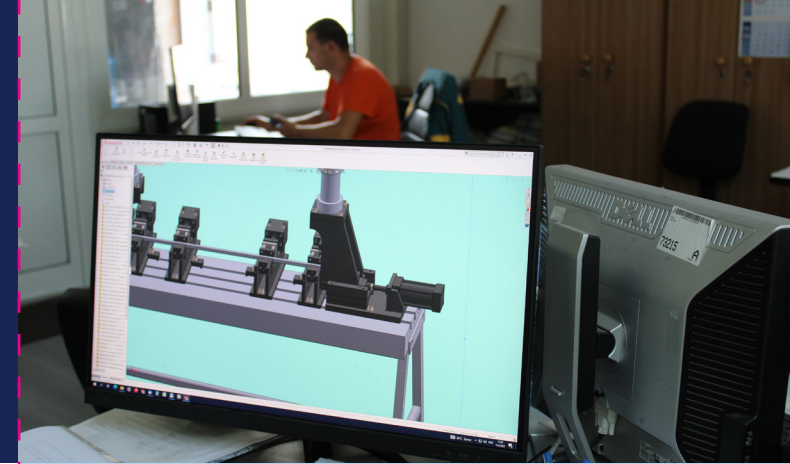

We are constantly improving the quality  
and adding value to our products

We have years of experience in manufacturing furniture for indoor use. During the years our portfolio has included chairs, tables, trolleys, parts of shelves, ladders and recently – service trolleys for industrial use.

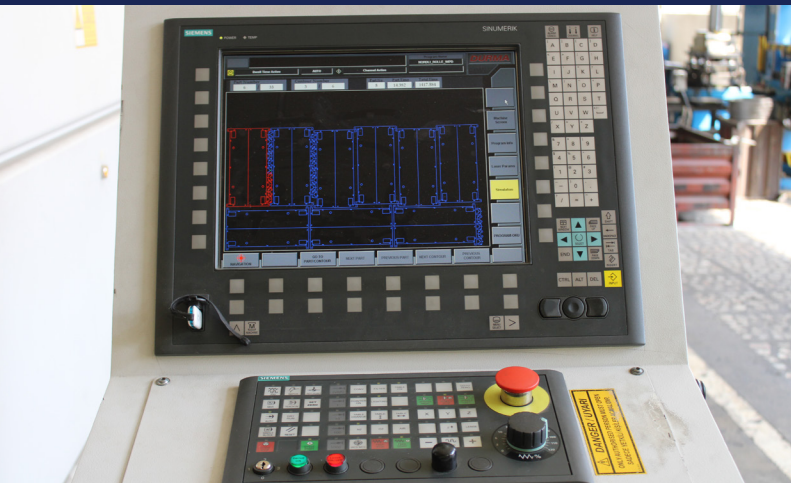

The business concept of BCC-95 is to offer safe, well-designed and high-quality furniture from carbon steel and plastics at a competitive price.

Chairs and tables design and commercial rights belong to IKEA of Sweden. Images to be taken as representation of production possibilities ONLY.

Main customers of BCC are the furniture giant IKEA and other furniture traders and producer from Scandinavia and Western Europe. Quality is proved on international markets but it also means that our products must be produced in a way that is environmentally and socially compliant.

BCC 95 Ltd. has a reputation of a socially-responsible employer and makes dedicated efforts to maintain a safe working environment.

We have various metal processing, plastic processing, powder coating and packaging equipment. We produce our tooling in house and this is a big competitive advantage.
